

19-04-2016

Dear Shareholders,

Dome Petroleum Resources Plc together with its Yellow Energy Ltd partners have just completed the 2015-2016 uranium, thorium & gold exploration program, and are awaiting chemical analyses results and geophysical reports.

Dome Petroleum Resources Plc is also actively pursuing renewable energy projects around the world, together with its oil, gas & Yellow Energy partners. Various projects have been agreed, signed and funding is now being actively sourced by the partners. Dome Petroleum Resources Plc has a 3% interest in the various projects.

In addition, PL 231, Reids Dome Gas field is scheduled for early production in 2017.

For security reasons, should you need information on the renewable projects please send us an email and we will supply you the information accordingly.

Sincerely,

The Management
